

LITERATURE SURVEY

1. Title : A taxonomy of Supply chain Coordination

Author : Ivanov, D., Dolgui, A., and Sokolov, B.

Year : 2018

Explanation :

This paper discusses the taxonomy of supply chain coordination strategies, including traceability, which plays a crucial role in pharmaceutical supply chains to ensure the quality and authenticity of drugs.

2. Title : Identification of mRNAs and lincRNAs associated with lung cancer progression using next-generation RNA sequencing from large patient cohorts.

Author : Gao, X., Kulkarni, V., and White, K. P.

Year : 2017

Explanation:

This study explores the use of RNA sequencing technology to trace genetic markers associated with lung cancer progression, demonstrating the application of traceability techniques in healthcare.

3. Title : Societal impact of blockchain technology - How can blockchain technology be used to facilitate secure, traceable and transparent systems

Author : Radanliev, P., De Roure, D., and Nurse, J.R.C.

Year : 2016

Explanation:

This article discusses the societal impact of blockchain, including its potential in creating secure and traceable systems, with applications in pharmaceutical supply chain traceability.
