

```
import './App.css';  
import Home from './Page/Home'  
  
function App() {  
  return (  
    <div className="App">  
      <header className="App-header">  
        <Home />  
      </header>  
    </div>  
  );  
}  
  
export default App;
```
